PROFESSIONAL SUMMARY

Motivated and ambitious final-year Computer Science Diploma student with a strong foundation in software development, networking, database management, systems administration, and security. Hands-on experience in building secure applications, troubleshooting technical issues, and designing network solutions through academic and practical projects. Passionate about technology, problem-solving, and continuous learning. Seeking a Work Integrated Learning (WIL) opportunity from August 2026 in software development, IT support, systems administration, networking, data, or cybersecurity.

TECHNICAL SKILLS

- **Programming:** Java, Bash, HTML, CSS, JavaScript
- **Web Development:** Flask, Secure Authentication, Form Validation
- **Databases:** MySQL, Database Design, Query Optimization
- **Networking:** TCP/IP, DNS, DHCP, VLANs, Firewall Configuration, Cisco Packet Tracer
- **Operating Systems:** Linux (Ubuntu, Kali), Windows Server
- **Cybersecurity:** Vulnerability Assessment, Secure Coding, Access Control, Basic Penetration Testing
- **Tools & Platforms:** Git, GitHub, Microsoft Office

- **Soft Skills:** Problem-Solving, Teamwork, Communication, Adaptability, Attention to Detail, Fast Learner

EDUCATION

- **National Diploma in Computer Science** | *Tshwane University of Technology* |
Expected Completion: December 2026
 - **Current Average:** 75%
 - **Relevant Modules:** Java Development, Object-oriented Programming, Web development, Information Security, Database Programming, Computer Architecture Organisation, Internet Programming
- **National Senior Certificate** | Langenhoven High School | 2022

PORTFOLIO / PROJECTS

- **IT Helpdesk**

Technology: Spring Boot · Java · PostgreSQL · Thymeleaf

Full-stack IT support ticketing system designed to streamline the logging, tracking, prioritisation, and resolution of support requests. Implemented role-based access control, ticket CRUD operations, priority tracking, and status management. The application uses Spring Boot for the backend, PostgreSQL for persistent data storage, and Thymeleaf for the server-rendered interface.

- **Bang Fashion Online Clothing Store [Group Project]**

Technology: HTML/CSS · JavaScript · Node.js · Express · PostgreSQL · Paystack

Full-stack e-commerce storefront for Bang Fashion Online Shop. Built a product catalogue with category filtering, product images, size selection, quantity controls, shopping cart, stock handling, and responsive mobile-first UI. Developed a Node.js/Express backend with PostgreSQL persistence for products, orders, and newsletter subscribers, including REST endpoints for product and order management. Integrated WhatsApp order hand-off and Paystack payments.

- **Resume Builder & Job Finder App [Group Project]**

Technology: HTML/CSS · JavaScript · Node.js · PostgreSQL

Web application focused on helping users create professional resumes through a guided form. Includes live resume preview, multiple resume templates, and downloadable formatted resumes. The portfolio identifies a Node.js and PostgreSQL stack for the application, demonstrating frontend form handling together with backend

- **HealthBridge**

Technology: Node.js · Express · EJS · RBAC · Authentication

Healthcare access platform for South African communities with role-based access for patients, doctors, and admins, plus appointment booking, queue management, virtual consultations, ambulance dispatch, medicine delivery, and rural health services.

CERTIFICATION

CISCO Introduction to CyberSecurity [August 2026]

- **IBM Data Science 101** [September 2025]
- **IBM Data Science Tools** [September 2025]
- **IBM Cybersecurity Fundamentals** [August 2025]
- **Microsoft AI Fluency** [August 2025]

EXTRACURRICULAR ACTIVITIES

- **Tennis (February 2025 – Present)**
- **Telkom 10X Hack (2025)**
- **IBM Datathon (2025)**
- **MAISH Hackathon (2025)**
